

# The key objectives of ATM-EXCITE

## COORDINATION

Enhanced civil military coordination.

### What we aim to do

Improve interoperability and coordination between civil and military aviation systems through better data sharing on flight plans and trajectories.

## AUTOMATION

Digitalized and automated airspace management

### What Aim To Do

Introduce advanced automation and digitalization processes, supported by AI, to streamline airspace management.

## SECURITY

Secure civil-military data exchange

### What Aim To Do

Develop cyber-secure systems for the exchange of sensitive surveillance data, ensuring confidentiality and integrity while reducing vulnerabilities of current technologies like ADS-B.

### What We Aim To Do

Leverage advanced technologies to reduce fuel consumption, enhance network capacity, and lower greenhouse gas emissions, supporting the European Green Deal's sustainability goals

## SUSTAINABILITY

Environmental and operational efficiency

## ENGAGEMENT

Environmental and operational efficiency

### What We Aim To Do

Foster collaboration through workshops, conferences, and stakeholder consultations to refine solutions and ensure alignment with user needs and regulatory standards
